ConstantinHacks@gmail.com · (240) 205-1683

Experienced Software Engineer with a demonstrated history of working with Mobile and Web Technologies. Looking for product-focused opportunities within a collaborative company.

Top Skills

- **Native Mobile Development** - 5+ years of developing native Android and iOS apps on a daily basis. Led development of an industry-leading conference app. Developed Fitness-Tracking app available on Apple App Store, written entirely in Swift.

- **Javascript** - 5+ years developing web and mobile apps. Proficient with VueJS as well as Mobile frameworks Ionic and React Native. Developed React Native mobile app on both iOS and Google Play store.

- **Start Up Experience** −3+ years of experience demonstrating my ability to balance long-term roadmap vision with the unavoidable shifting of short-term priorities in an agile, startup environment.

Work Experience

Rivers Agile Technologies | Pittsburgh, PA
Full-Stack Web Developer   December 2019 - Present

- Re-engineered client's legacy front-end from pugJS to VueJS.
- Assisted the project manager in establishing the project plan by evaluating and estimating workload.
- Participated in bi-weekly product demos to demonstrate our progress.

Cadmium CD | Bel Air, MD
Lead Android Engineer   October 2018-December 2019

- Improved Google Play Store rating from 2.9 to 4.3 in 10 months
- Led Android development of an industry-leading conference app
- Collaborated with management, marketing, and sales to strategize and execute on product features

Omnitracs Roadnet Technologies | Towson, MD
Mobile Application Developer (Contract)   April 2018 − October 2018

- Developed & maintained mobile apps for Route & Fleet Management used by more than 10,000 clients
- Performed additional full stack development work on ASP.NET server and Web App
- Worked with customer service to resolve customer reported bugs in production

Mindgrub Technologies | Baltimore, MD
Mobile Software Engineer   August 2016- April 2018

- Worked closely with UI/UX designers to ensure an excellent user experience in our products
- Built products that are accessible to everyone, including those with disabilities
- Researched Swift, Java and Kotlin best practices for developing native apps
